

MOHAMMED MUAZ

MULTIMEDIA DESIGNER | DIGITAL MARKETING | BUSINESS ANALYTICS

Dehiwala, Colombo, Sri Lanka | +94 77 840 5184 | itmazua@gmail.com

[Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Multimedia Designer and BICT graduate with hands-on experience across digital marketing, UI/UX design, and applied data analytics. Proven ability to translate business and brand requirements into high-quality creative output, from resort brand campaigns and social content to data-driven prototypes and business-facing dashboards. Combines strong visual design judgment with technical execution in front-end development and data analysis, enabling end-to-end ownership of digital products from concept to deployment.

CORE SKILLS

- Digital Marketing & Content: Social media campaign design, brand content strategy, video ads & Reels/TikTok content, motion graphics, engagement-focused creative, campaign execution
- Business Analytics: Data analysis with Python, applied machine learning (Random Forest, SHAP explainability), dashboarding with Streamlit, translating data into business-useable insights
- UI/UX & Product Design: User-Centered Design (UCD), UX principles, user research, information architecture, low-fidelity prototyping, responsive design, Figma
- Graphic & Multimedia Design: Branding, visual identity, logo design, typography, marketing creatives
- Web Development: HTML5, CSS3, React, Next.js, TypeScript, Tailwind CSS, Bootstrap, basic JavaScript, Git/GitHub
- Software & Tools: Figma, Adobe Photoshop, Illustrator, Premiere Pro, Canva, Antigravity, Lovable AI

PROFESSIONAL EXPERIENCE

Multimedia Designer | OV Holidays Pte Ltd

Nov 2024 – Dec 2025

- Led brand asset development across 15+ resort properties, including logo refinement and high-end materials such as loyalty cards and vouchers
- Designed and produced social media campaigns, carousels, flyers, and trend-aware video ads for Instagram Reels and TikTok, to grow brand visibility and engagement
- Created professional video ads and trend-aware content across social platforms
- Developed motion graphics and short-form animation to strengthen digital storytelling across web and social channels
- Worked cross-functionally with marketing stakeholders to keep brand messaging and visual identity consistent across a large multi-property portfolio

Chief Editor | Muslim Majlis, University of Colombo

Sep 2024 – Jan 2026

- Established and recruited a dedicated media team to handle all digital and print publication requirements
- Owned the end-to-end editorial pipeline, review, design, and publication of articles for the official blog
- Designed the organization's logo and contributed to the UI design of its website
- Previously served as Tamil Editor (2024/2025 term), ensuring high-quality content standards across languages

KEY PROJECTS

LucidEpoch , AI-Based Sleep Disorder Risk Assessment Framework | Final-Year Research Project

- Contributed to an AI-powered machine learning framework assessing multiple sleep disorder risks using wearable health data, built with Antigravity and deployed using Streamlit
- Supported implementation of a Multi-Output Random Forest model for simultaneous prediction of sleep-related conditions
- Applied Explainable AI (SHAP) techniques to improve model interpretability and transparency for non-technical stakeholders

- Gained end-to-end experience in development, hosting, testing, and technical problem-solving in a real research context

[Live App](#) | [GitHub](#)

ServiceHub, Services Marketplace Platform (Business & Product Design) | Personal Project

- Designing and building a premium two-sided services marketplace connecting customers in Colombo, Sri Lanka with verified home service professionals (electricians, plumbers, carpenters, mechanics)
- Authored the full project brief and PRD, including user personas, customer/worker/admin app flows, verification and commission logic, and a custom "Colombo Premium" design system (dark charcoal + warm gold, Inter typeface)
- Designed the interface in Figma, covering customer booking flow, worker job management, and an admin dashboard
- Tech stack: Next.js (App Router), Tailwind CSS, token-based design system, mock JSON data structured for future API integration
- Status: currently in active development; frontend build in progress

[Design Link](#)

Personal Portfolio Website | Designed & Developed | Hosted on Vercel

- Designed and developed a fully custom personal portfolio website end-to-end, from wireframe to deployment, using a modern React/Next.js architecture with the App Router
- Built with TypeScript, React, Next.js, Tailwind CSS, and Framer Motion (animations); designed in Figma
- Features component-based architecture, light/dark theme support, and smooth page animations

TaskFlow, To-Do Application (Mobile) | University Assignment | Android Studio

- Designed and developed TaskFlow, a task management mobile application, as a university assignment, covering both UI and core functionality
- Gained experience in mobile UI design principles, app logic, and basic CRUD functionality

[GitHub](#) | [APK Release](#)

UI Design, Figma Projects | Personal Design Practice

- Designed additional UI concepts using Figma, exploring layout, component structure, and interface flow for app and web screens
